TESTIMONIALS

Zoheb Ansari

When I started my journey in aviation, my goal was to build a strong foundation and gain practical skills that would prepare me for a successful career. The training exceeded my expectations with its well-structured curriculum, perfect blend of theory and real-world application and deep industry insights. The classroom environment was supportive and engaging, with trainers who encouraged open discussions and provided constant guidance.

Karishma Choudhary

Before joining, I expected basic aviation knowledge and communication improvement, but the training exceeded my expectations. The program was practical, well-structured, and focused on real-world airline operations. The supportive classroom environment boosted my confidence, improved my personality and gave me clear career direction. I am currently placed at SAACH Travel Technology as a Group Travel Executive, where I confidently apply my training, communication skills and aviation knowledge in my role.

Sultan Arab

My journey at SAACH Travel Technologies has been truly professional and growth-oriented. The classroom environment was positive and encouraging, which helped me stay confident throughout the training. Our trainer explained every concept with clarity from airport codes and reservations to Amadeus basics - making the learning process seamless. The training significantly improved my communication skills and helped me overcome hesitation. I now feel more confident while speaking to customers and using aviation terminology.

Laiqa Ghazi

My learning journey at Saach Travel was truly enriching. The trainers were supportive and explained IATA concepts clearly, making learning both easy and practical. I gained hands-on knowledge of ticketing, PNR creation, fare pricing, refunds, world geography, and airline reservation systems. The training and work experience at Saach helped me build my skills and confidence, playing an important role in my professional growth. Today, I am proud to be working with WNS, and I sincerely thank Saach for giving me a strong foundation for my career.

Kadambari Kasare

Starting my journey at Saach Technologies as a trainee gave me a strong foundation, thanks to structured learning, an excellent training environment and supportive mentorship. With time, increasing responsibilities and opportunities helped me grow into the role of Senior Associate. Saach Technologies has played a key role in my professional development through its focus on learning and career growth. The collaborative culture and approachable leadership have made the journey both smooth and rewarding.
